

Christmas Cracker Paper Craft

You will need:

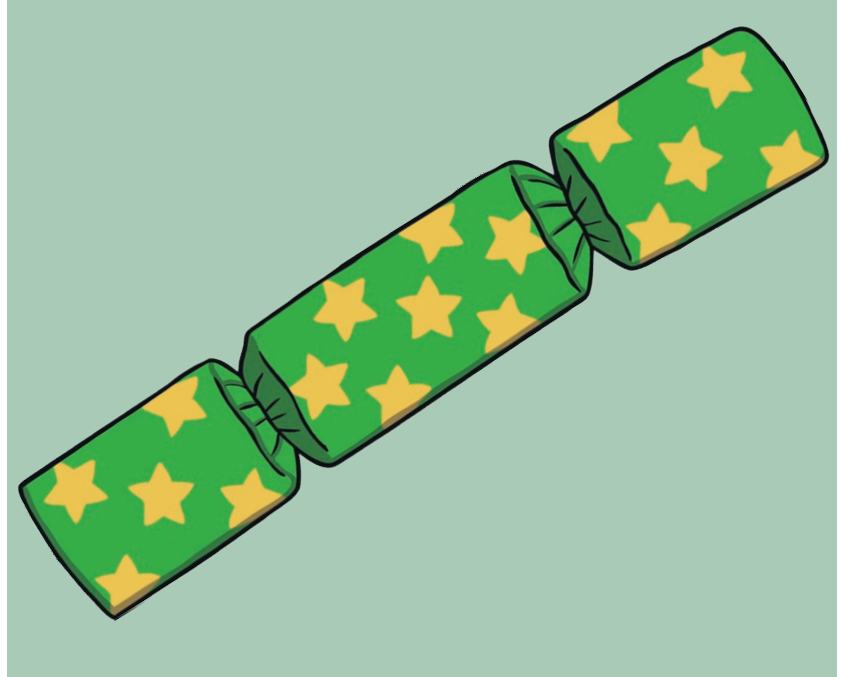

Christmas Cracker Paper Craft page.

Scissors

Glue

Thin string

Ruler, (optional for neater folding).

Instructions

1. Cut out the outline of the shape. At this stage, don't cut out the diamond shaped sections at the top and bottom of the shape.
2. Fold along the dotted lines. You may wish to use a ruler to make the fold lines sharp and crisp. All folds are mountain folds, folding away from you.
3. Now you will have fold lines across the diamond shaped sections mentioned above. Cut out these sections neatly with scissors. The fold lines make the shapes easily accessible with scissors.
4. Glue tabs 1, 2 and 3. Stick tab 1 to its opposite edge on the centre of the cracker, and 2 and 3 to form the top.
5. Tie the top and bottom of the cracker with thin string to keep the shape together.
6. For best results, colour the cracker before printing or print onto coloured card. You may wish to hide a small gift inside the cracker, (put this in before gluing and tying), and give it to a friend.
