

The children in Salamander Class had a vote to find their most popular shape. Each child had 2 votes.

1. What was the most popular shape?
2. How many people voted for the pentagon?
3. How many more people voted for the square than the triangle?
4. What was the least popular shape?
5. How many people voted for the rectangle?
6. How many people voted for the hexagon and the octagon?
7. What is the difference between the number of people that voted for the triangle and the number of people that voted for the rectangle?
8. How many people voted altogether?
