

RMeasimaths

Challenge:

Can you do 3 sessions a week of online Maths?

Dear Parents/Carers

We have been working hard to develop ways to support both parents and children in these difficult times. To help access the Maths curriculum the children are now able to use RMeasimaths which is an online Maths resource. Once logged in children can access a variety of activities to progress through levels and earn certificates. Those children in Year 2 who already know how to use RMeasimaths will be able to log in using your current details and continue.

You will need audio on your device to be able to hear the questions. Some of the questions will teach you how to answer them first. For example you will be shown what half past seven looks like on the clock before the time questions begin.

Each session will be approx. 15minutes and it tell you when it has finished

We hope you have fun and enjoy using this additional resource. If you wish to use RMeasimaths but you are unable to log on, please email your class teacher directly.
